Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1, 2, 4, and 19-44 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-29 of U.S. Patent No. 6,234,677. Although the conflicting claims are not identical, they are not patentably distinct from each other because they both claim a soft-sided insulated container comprising first and second insulated container portions with a monolithic liner in at least one of the portions.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Art Unit: 3727

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2, 23, 24, 28, 34, 35 and 36 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Jacober '314. See Fig. 4.

5. Claims 1, 19-23, 28 and 29 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Davis.

To the degree that Davis does not disclose the first insulated container portion B as being made of a rigid material, the first insulated container portion B is capable of being collapsed as claimed. Furthermore, the second insulated wall structure of the second collapsible insulated container portion C is found in the common wall segregating the container portions B and C.

6. Claims 1, 19-25, 28 and 29 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Creamer et al.

To the degree that Creamer et al. does not disclose the second insulated container portion 3 as being made of a rigid material, the second insulated container portion 3 is capable of being collapsed as claimed. Furthermore, the first insulated wall structure of the first collapsible insulated container portion 5 is found in the common wall segregating the container portions 3 and 5.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 2, 4 and 34-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Davis in view of Lin.

Davis discloses the claimed device, as discussed above, except for the first container portion B having liner. Lin discloses that it is known in the art to provide a liner in an analogous insulated container portion. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the insulated container portion B of Davis with the liner of Lin, in order to prevent the insulated wall structure from being moistened by cold drinks or foods.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
